

**Package
with 50mts**

Description

Chain made of high-durability plastic material (polypropylene), with dimensions that allow its use in combination with pedestals ranging from the small to the largest ones, with great efficiency. Provided in bags of 50 meters.

Application

Signage and temporary demarcation of areas where there is a flow of people, usually used in combination with one of our pedestals as support.

Differentials

Made entirely of weather-resistant plastic, with bright colors that allow for optimal viewing even from a distance.
